For Agricultural Applications**

ISBN : #3659136980 | Date : 2012-06-27

Description :

PDF-3536c | A low cost portable remote sensing system has been established for use in crop health assessment and large scale land resource assessment. The important features of the system are; it monitors the near infrared, which is important for agricultural applications, and it incorporates position and attitude measuring equipment allowing for geo-rectified images to be produced without the use of ground c... *A Low-Cost Portable Remote Sensing System: For Agricultural Applications*
