Description :

PDF-554e4 | This book provides a practical tool to indicate ecotourism sustainability at local and national scale. A new approach (MAVN) has been proposed based on maximum number of visitors that can be allowed per year to visit an ecotourism providing forest. This approach is applicable to both production and protection forests. If adopted, the approach can play a complementary role towards sustainable fores... *A new approach to Low-Carbon Ecotourism Development: From the perspective of climate change mitigation and adaptation*
